# DOCA OFED driver installation on Red Hat Enterprise Linux 9.6

This document provides a brief description of the DOCA OFED 3.1.0 driver installation process on Red Hat Enterprise Linux 9.6 using "dnf" commands.

#### **Prerequisites:**

Make sure that the distro InfiniBand drivers are not installed on your system since these RPMs will conflict with DOCA OFED RPMs. If you have setup a repository for RHEL 9.6 RPMs for your system, please execute the following command to uninstall distro InfiniBand RPMs.

# # dnf group remove "infiniband support"

**Note:** Install python3 as a prerequisite.

#### Important:

This repository supports the following kernel versions only:

• **5.14.0-570.12.1.el9\_6.x86\_64** or any errata kernel version that maintains kABI compatibility with this release.

#### Installation:

Once you are subscribed to DOCA\_OFED repository, execute the following command to install DOCA OFED:

# dnf install doca-ofed-3.1.0

### Note:

To load the new driver modules, either run the following command or reboot the server after DOCA OFED installation.

# #/etc/init.d/openibd restart

## **Uninstallation:**

In case all the DOCA OFED RPMs need to be uninstalled, execute the following command:

# ofed\_uninstall.sh --force
